For all the right connections!

Telemecanique

Improve The Performance Of Your Machines

With Magelis™ XBT-G graphic terminals – the most comprehensive and powerful range of graphic touch screen terminals on the market.

- **Images and sounds are combined for powerful multi-media displays!** Controls are easy and intuitive for humans, powerful and flexible for machines.
- **Talk to your machines with ease!** Logs for alarms, trend charts, numerous character fonts and use of multiple languages. Projects can be developed quickly and easily in a Windows® environment (with Vijeo Designer software, sold separately). A comprehensive dynamic object library reduces configuration time.
- **Flexible communications make integration (and your job) easier!** Terminals come with onboard Ethernet and simultaneous multiple link with Unitelway, Modbus® or Modbus TCP/IP. They're even open to web technology with Java® scripting.

From the simplest display panel to the most sophisticated control terminals, you will always find the ideal Magelis™ solution for your control system.
