The Fingerprint Keypad Lock Makes Granting Or Restricting Access Automatic!

The Fingerprint Keypad Lock combines a conventional cylinder lockset with state-of-the-art fingerprint-reading circuitry and a digital keypad.

- **Practical and convenient!**

It's excellent for storage areas or anywhere it's impractical or undesirable to distribute keys to everyone requiring access, and eliminates the problem of unauthorized keys being cut at the local hardware store.

- **Quick and simple installation with durable construction!**

The Fingerprint Keypad Lock has a simple latch mortise and can store up to 120 different fingerprints. A super integrated circuit chip easily allows a full-function program of enrolling and erasing fingerprints. It is made of super durable material, and the lock may be opened by mechanical key in the event of an emergency.

**Call DSG today and put the
Fingerprint Keypad Lock to work for you!**
